[JOHNSONCLOSETS.COM](http://JOHNSONCLOSETS.COM)

# About US

Johnson Closets is founded by Johnson Chen of Johnson Design Homes. As a premier luxury home builder in the greater Seattle area, Mr. Chen is always searching for the finest quality and design for everything in the homes he builds— closets, pantry, and shelves are no exceptions. However, the quality and installation process of even the existing “brand name” closet and cabinet companies have left much room for improvement.

Mr. Chen's frustration with what was available in the market led to his invention of Johnson Connector. Mr. Chen established a manufacturing factory to make custom closets for his homes with his revolutionary approach to production efficiency. The results are better design and better quality at a lower cost. Seeing the demand for closet solutions, Mr. Chen decided to start Johnson Closets to allow home owners to enjoy enhanced quality products at an affordable price.

# JOHNSON CLOSETS

## Our Differences

### Finest Materials. Best Innovative Hinge System. Most Competitive Price.

Johnson Closets uses only the finest materials. Our closets are made of a combination of solid hardwoods and veneers over 7-ply cabinet plywood cores, as opposed to particle boards used by other popular closet makers. Our fully recyclable products are the ideal choice for green-conscious customers. In addition, the system can be trimmed with solid hardwood crown moulding and base to match the level of trim in your home to complete the custom built-in look.

Johnson Closets uses the most innovative hinge system—our proprietary “Johnson Connector Composite Structure,” patent-pending in the United States, and patented in China and Taiwan. Johnson Connector not only gives us the exclusive benefit of easy installation without exposed nail holes, but also great design efficiency as well as high level of production flexibility and efficiency. The turnaround time from design to a beautifully installed closet system, regardless of the complexity, is only a few days.

Johnson Closets saves you money. We are able to offer higher quality products at a much lower price because:

- (1) We own our manufacturing factory.
- (2) We offer direct sales without the overhead of a middle man.
- (3) We take in a significantly lower profit margin compared to our competitors.

## PANTRY

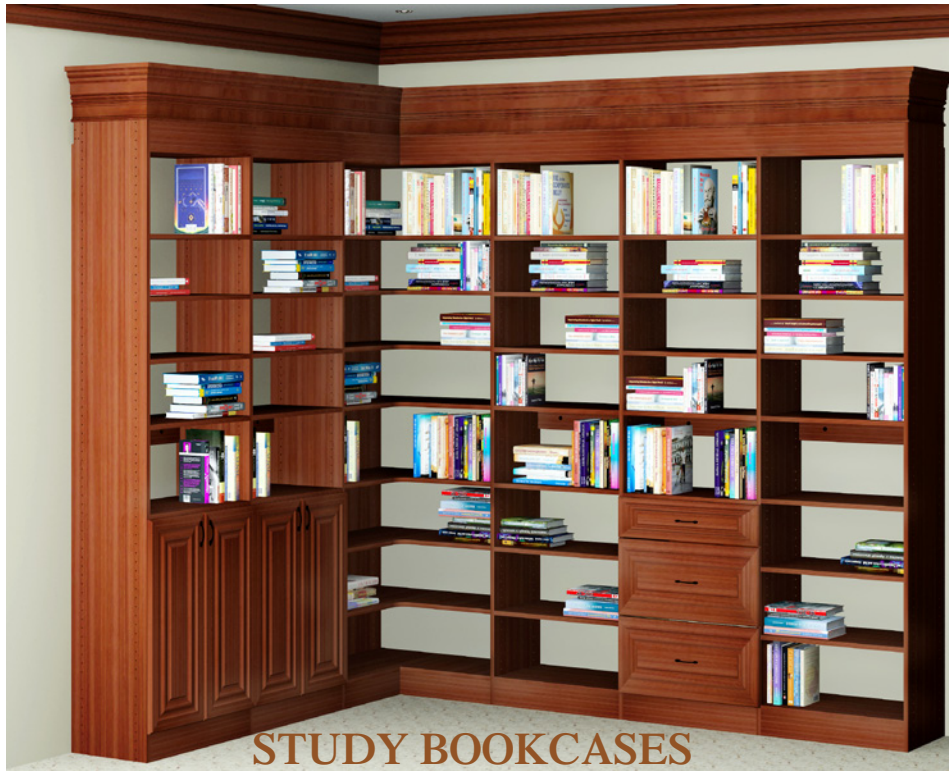

Whether your pantry is a single wall cabinet or an entire room, you will love how well things are organized and how easy it is to find the things you need.

## BOOKCASES

In your home office or family room, our bookshelves not only add functional space for organizing your collection of books or photo albums, but add elegance to a traditional or contemporary style room as well.

## WALK-IN CLOSETS

Walk-in closets should be the most functional space in your home. They should also reflect your personality and your style.

STUDY BOOKCASES

WINE RACK

## DESIGN

There are many factors to consider when designing a storage solution. What are you storing? What is your budget? Once you have decided on your need and priority, you are ready to begin.

## MEASURE THE SPACE

Taking measurements of your space is an important step in the design process. You will need accurate measurements of your room, including doorways, windows, and other openings to cut for a perfect fit.

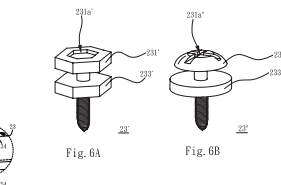

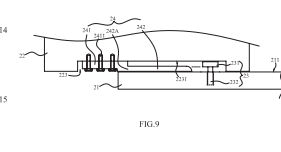

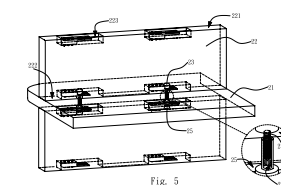

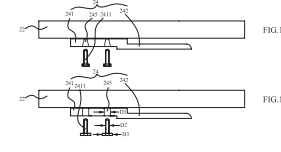

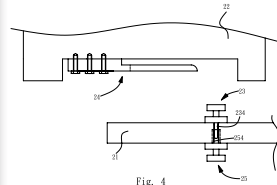

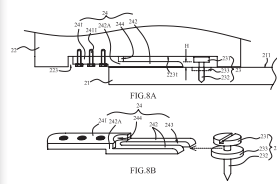

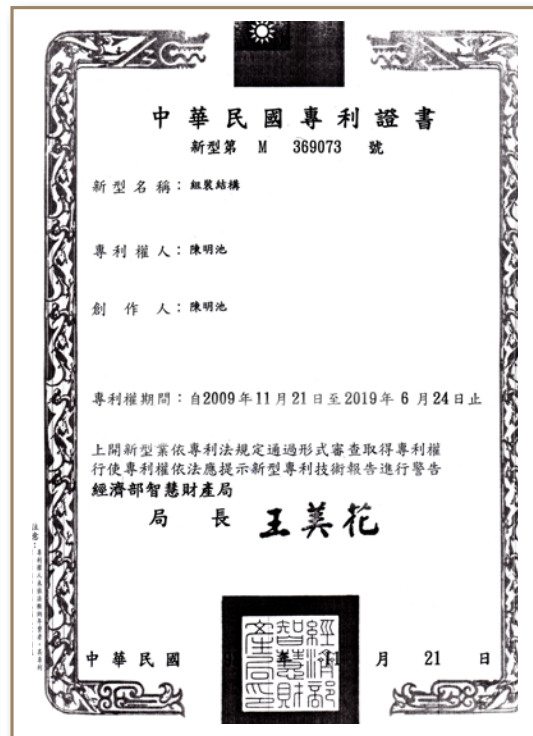

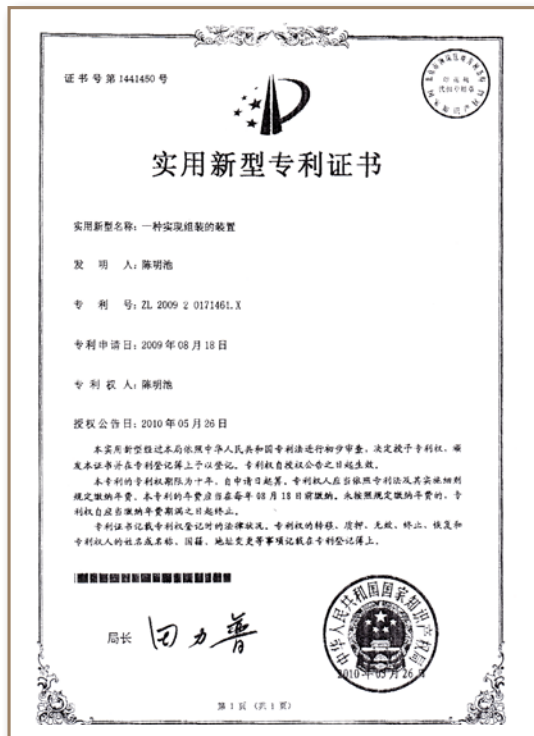

- (1) For walk-in closets and pantries: take measurement of the surrounding walls of the room.
- (2) For reach-in spaces: take measurement of the back wall and the two return walls of your closet/pantry. Since most walls are not perfectly squared, we recommend that you measure across each wall at 3 different heights and record the smallest dimension.

Once you have all the measurements, sketch an overhead view of the room and add the wall dimensions and any openings.

# OUR PATENT

Our patented “Johnson Connector Composite Structure” makes installation easy and precise, all without exposed nail holes. The traditional “screws and nails” approach used by other closet companies requires the skills of fine carpentry, while the innovative locking mechanism of Johnson Connector makes precision and tight fit achievable, even for home owners.

“Johnson Connector Composite Structure” is currently patented in China and Taiwan, and patent-pending in the United States.

## INSTALLATION: PAGE 1

- 1 Install top of wall track, level, entire length of wall 89 1/2 inches above the floor. Secure wall track to studs 16 inches on center with 2 inch screws. To splice wall track – overlap and install two 2 inch screws into sheet rock. (No stud required.)

### MODEL: HG-47" (CUT)

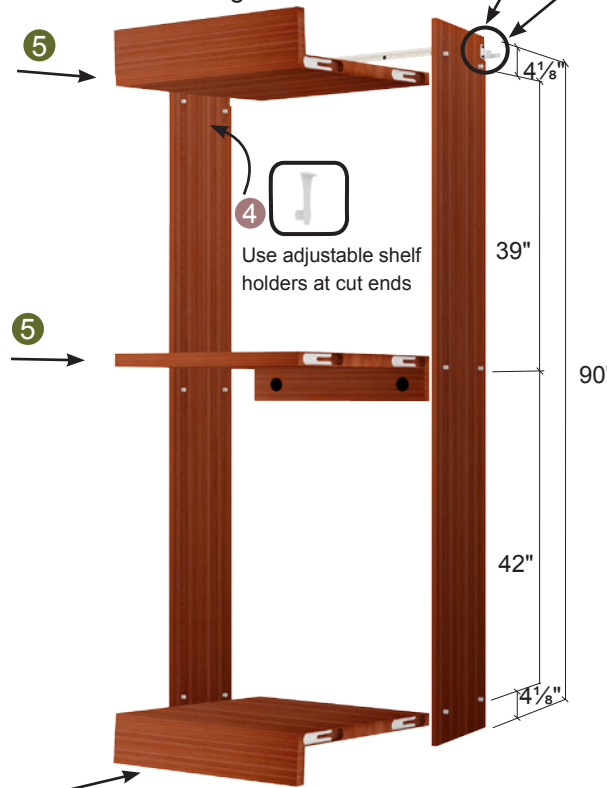

#### Cut to Fit

- 3 Cut one end of shelving to desired length

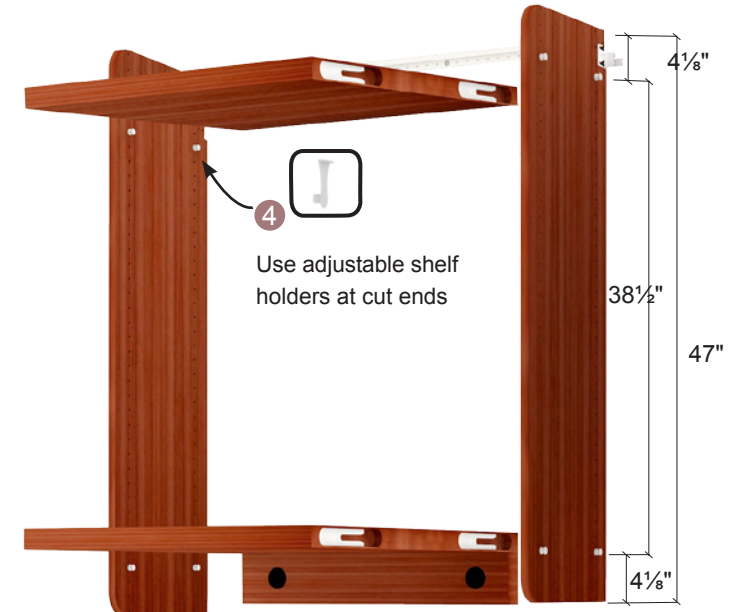

- 2 Install mounting bracket to side/end panel with bolt and wing nut supplied. (Hand tight) Then hang panel to top of wall track.

- 5 Install support shelf, starting from bottom to top use shelf holders in end panel at cut ends.

### MODEL: HG-47" (CUT)

## FACES & FINISHES

We offer many different styles of door and drawer faces for a traditional or contemporary theme, and a range of diverse finishes to match the trim level of your home and decorating needs.

HD-71" (6)

## INSTALLATION: PAGE 1 of 3

**1** Install top of wall track, level, entire length of wall 86 inches above the floor. Secure wall track to studs 16 inches on center with 2 inch screws. To splice wall track – overlap and install two 2 inch screws into sheet rock. (No stud required.)

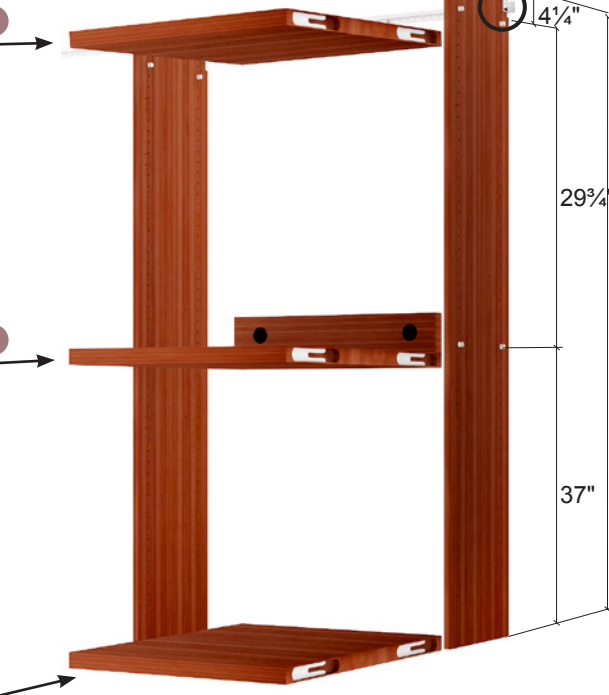

**2** Install mounting bracket to side/end panel with bolt and wing nut supplied. (Hand tight) Then hang panel to top of wall track.

**3**

**3**

**3**

**Top Piece**

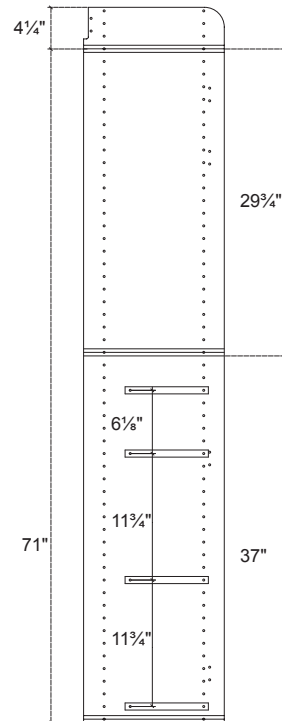

Attach top base to support shelf.

**Middle Piece**

Secure shelf to wall.

**Bottom Piece**

Attach top base to support shelf.

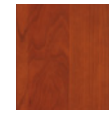

**3** Slide the shelves onto fittings (installed in holes at designated height) starting from the bottom and working up.
